A large decorative graphic consisting of a dark green horizontal bar on the left, which transitions into a lighter green shape that tapers to a point on the right. This shape is overlaid by a teal-colored parallelogram that also tapers to a point on the right, creating a layered, arrow-like effect.

# US Macroeconomic Outlook

# The US has rebounded strongly from lockdowns...

## 2020 personal income growth

## Citi US Economic Surprise Index

- Policy measures have **increased** consumers' spending power:
  - Thanks to one-time stimulus checks and enhanced unemployment benefits, the federal government has temporarily separated 'loss of income' from 'loss of employment'
  - While these measures will fade, personal income should still be higher in 2020 than 2019, providing material support to the economy

- Causing a much sharper rebound in activity:
  - The speed of the initial economic bounce back has far exceeded all expectations with data beating consensus by an unprecedented degree
  - Given fading stimulus and rising consensus estimates, we would expect data surprises to moderate in coming months

Source: (LHS) US Bureau of Economic Analysis, as of August 31, 2020; (RHS) Bloomberg, as of October 2, 2020.

# ...but an output gap will persist

## COVID-19 sensitivity

## Unemployment by layoff type

- A portion of the economy faces a structural shock:
  - We have seen a strong bounce in sectors like auto production that can operate in a ‘COVID world’
  - However, of the 10% drop in GDP, about 3% comes from sectors, like airlines, that cannot operate as normal until after a vaccine, which we expect will keep the economy below potential at least through 2022

- Permanent damage is building:
  - While elevated temporary layoffs create the potential for continued strong job gains, permanent layoffs continue to rise
  - Permanent layoffs since March alone would keep unemployment at 5%, which is why we expect a multi-year process to return to ‘full employment’

Source: (LHS) Federal Reserve Bank of St. Louis, as of June 30, 2020; (RHS) Federal Reserve Bank of St. Louis, as of September 30, 2020. Temporary layoff: Employer temporarily cuts back or ceases an employee’s employment with the understanding that the employee will be recalled within a certain period of time. Permanent layoff: Permanent severing of the employment relationship by the employer for economic reasons.

# Although improving, US labor market has a long way to go to reach pre-COVID levels

## US unemployment rate

## Job openings

- Labor market uncertainty remains:

- The US has replaced 11.4 million of the 22 million jobs lost in March and April; however, recent data of monthly nonfarm payrolls reveals a decline in job growth and September marks the first month of hiring below one million
- Although official unemployment has fallen from a pandemic high of nearly 15% to 7.9%, large corporate layoffs continue across the US (e.g., Disney, United Airlines)

- Job openings have rebounded sharply:

- In less COVID-sensitive sectors, the demand for labor has recovered materially, paving the way for future job gains
- Given the structural shifts underway, we expect to see elevated gross labor flows, both hiring and firing, well into 2021

Source: (LHS) Federal Reserve Bank of St. Louis, as of September 30, 2020; (RHS) Federal Reserve Bank of St. Louis, as of July 31, 2020. <sup>1</sup> U6 unemployment rate includes discouraged workers who have quit looking for a job and part-time workers who are seeking full-time employment. <sup>2</sup> U3 official unemployment rate.

# Personal consumption has rebounded sharply

## Personal consumption expenditures

## Credit card debt

- The pandemic has caused unprecedented shifts in spending:
  - This is the first recession where spending on durable goods has increased as consumers spend more on cars and household goods given more remote working
  - Given the reliance on travel and gatherings, (and pace of reopening and mobility activity) services spending has rebounded more slowly, giving consumers room to boost savings and spending on goods
- Consumers de-levering:
  - Given lower spending and elevated incomes, consumers have actually paid down over \$110 billion in credit card debt since the outbreak of the virus
  - From April through September, we estimate Americans have saved an excess \$900 billion, creating spending capacity to further boost the economy in 2021<sup>1</sup>

Source: (LHS) Federal Reserve Bank of St. Louis, as of July 31, 2020; (RHS) Federal Reserve Bank of St. Louis, as of September 16, 2020.

<sup>1</sup> Insight estimate based on the change in the savings rate from pre-COVID trend over April to September.

# Housing — a continued bright spot

## Mortgage purchase applications

## Housing market – a ‘V’ shaped recovery

- Mortgage rates remain low in response to pandemic fears:
  - Borrowers are responding to lower rates, pushing mortgage applications to 13-year highs
  - Despite elevated asset prices, intact personal income and a trend towards deurbanization have opened the market to first-time homebuyers

- Low rates stimulate home purchase demand:
  - The exodus from urban cities to suburban neighborhoods, brought on by the health crisis and lower financing costs, has led consumers to pull forward purchasing decisions
  - However, given lower inventories and interest rates, declining affordability (and competing offers) could hinder buyers’ ability to find homes within their price point

Source: (LHS) Mortgage Bankers Association, as of September 30, 2020; (RHS) Bloomberg, as of August 31, 2020.

# 'Work from home' environment creates sector divergence

## Real software spending

## Share of manufacturers with unfilled orders (3 month average)

- Tech investment has soared:
  - Spending on technology has enjoyed secular growth for years, and the pandemic has accelerated several years of change into mere months
  - We expect intellectual property investment to continue growing over 5% for the foreseeable future
- But traditional manufacturing is lagging:
  - Fewer manufacturers have backlogs of orders as corporate America reduces traditional cap-ex spending
  - While the auto sector has been a bright spot, reliance on the energy and aerospace manufacturing sectors will weigh on fixed asset investment's recovery

Source: US Bureau of Economic Analysis and Census Department, as of July 31, 2020.

# Inflation pressures are benign for now

## Core PCE<sup>1</sup>

## Flexible CPI<sup>2</sup>

- Core PCE remains well below target:
  - Core PCE has recovered some of its losses and should enjoy favorable base effects next year
  - Given the Fed’s new stated preference for a moderate overshoot after years of persistent undershoots, it appears likely that we are years from Fed tightening
- COVID-19 has caused severe price shifts:
  - Goods and services with reactive prices have bounced back given resilient demand but remain below pre-COVID levels, pointing to continued excess capacity
  - While flexible prices have reset, potential disinflation pressure from rents and healthcare may take time to feed into the data, posing a medium term risk to inflation

Source: (LHS) BEA, as of August 31, 2020; (RHS) Atlanta Fed, as of August 31, 2020. <sup>1</sup> Core PCE price index measures the prices paid by consumers for goods and services without the volatility caused by movements in food and energy prices to reveal underlying inflation trends. <sup>2</sup> Flexible Price Consumer Price Index (CPI) is calculated from a subset of goods and services included in the CPI that change price relatively frequently.

# The Fed is on hold for years

- The Fed expects to keep interest rates unchanged at least through 2023 and under its new average inflation framework will not raise rates until inflation has hit 2% and there is 'full employment'
- As a consequence, they will not engage in pre-emptive hikes to slow a strong labor market as they did from 2016 to 2018
- We expect rates to be on hold for several years and for the Fed to continue its \$130 billion monthly QE program through 2021

This document has been prepared by Insight North America LLC (INA), a registered investment adviser under the Investment Advisers Act of 1940 and regulated by the US Securities and Exchange Commission. INA is part of 'Insight' or 'Insight Investment', the corporate brand for certain asset management companies operated by Insight Investment Management Limited including, among others, Insight Investment Management (Global) Limited, Insight Investment International Limited and Insight Investment Management (Europe) Limited (IIMEL).

Opinions expressed herein are current opinions of Insight, and are subject to change without notice. Insight assumes no responsibility to update such information or to notify a client of any changes. Any outlooks, forecasts or portfolio weightings presented herein are as of the date appearing on this material only and are also subject to change without notice. Insight disclaims any responsibility to update such views. No forecasts can be guaranteed.

Nothing in this document is intended to constitute an offer or solid action to sell or a solid action of an offer to buy any product or service (nor shall any product or service be offered or sold to any person) in any jurisdiction in which either (a) INA is not licensed to conduct business, and/or (b) an offer, solicitation, purchase or sale would be unavailable or unlawful.

This document should not be duplicated, amended, or forwarded to a third party without consent from INA. This is a marketing document intended for institutional investors only and should not be made available to or relied upon by retail investors. This material is provided for general information only and should not be construed as investment advice or a recommendation. You should consult with your adviser to determine whether any particular investment strategy is appropriate.

Assets under management include exposures and cash, and are calculated on a gross notional basis. Regulatory assets under management without exposures shown can be provided upon request. Unless otherwise specified, the performance shown herein is that of Insight Investment (for Global Investment Performance Standards (GIPS®), the 'firm') and not specifically of INA. See the GIPS® composite disclosure page for important information and related disclosures about firm performance.

**Past performance is not a guide to future performance, which will vary.** The value of investments and any income from them will fluctuate and is not guaranteed (this may partly be due to exchange rate changes). Future returns are not guaranteed and a loss of principal may occur.

All performance numbers used in the analysis are gross returns. The performance reflects the reinvestment of all dividends and income. INA charges management fees on all portfolios that they manage and these fees will reduce the returns on the portfolios. For example, assume that \$30 million is invested in an account with INA, and this account achieves a 5.0% annual return compounded monthly, gross of fees, for a period of five years. At the end of five years that account would have grown to \$38,500,760 before the deduction of management fees. Assuming management fees of 0.25% per year are deducted monthly from the account, the value at the end of the five year period would be \$38,022,447. Actual fees for new accounts are dependent on size and subject to negotiation. INA's investment advisory fees are discussed in Part 2A of its Form ADV. A full description of INA's advisory fees are described in Part 2A of Form ADV available from INA at [www.adviserinfo.sec.gov](http://www.adviserinfo.sec.gov).

Targeted returns intend to demonstrate that the strategy is managed in such a manner as to seek to achieve the target return over a normal market cycle based on what Insight has observed in the market, generally, over the course of an investment cycle. In no circumstances should the targeted returns be regarded as a representation, warranty or prediction that the specific deal will reflect any particular performance or that it will achieve or is likely to achieve any particular result or that investors will be able to avoid losses, including total losses of their investment.

The information shown is derived from a representative account deemed to appropriately represent the management styles herein. Each investor's portfolio is individually managed and may vary from the information shown. The mention of a specific security is not a recommendation to buy or sell such security. The specific securities identified are not representative of all the securities purchased, sold or recommended for advisory clients. It should not be assumed that an investment in the securities identified will be profitable. Actual holdings will vary for each client and there is no guarantee that a particular client's account will hold any or all of the securities listed.

The quoted benchmarks within this presentation do not reflect deductions for fees, expenses or taxes. These benchmarks are unmanaged and cannot be purchased directly by investors. Benchmark performance is shown for illustrative purposes only and does not predict or depict the performance of any investment. There may be material factors relevant to any such comparison such as differences in volatility, and regulatory and legal restrictions between the indices shown and the strategy.

Transactions in foreign securities may be executed and settled in local markets. Performance comparisons will be affected by changes in interest rates. Investment returns fluctuate due to changes in market conditions. Investment involves risk, including the possible loss of principal. No assurance can be given that the performance objectives of a given strategy will be achieved.

Insight does not provide tax or legal advice to its clients and all investors are strongly urged to consult their tax and legal advisors regarding any potential strategy or investment.

Information herein may contain, include or is based upon forward-looking statements within the meaning of the federal securities laws, specifically Section 21E of the Securities Exchange Act of 1934, as amended. Forward-looking statements include all statements, other than statements of historical fact, that address future activities, events or developments, including without limitation, business or investment strategy or measures to implement strategy, competitive strengths, goals expansion and growth of our business, plans, prospects and references to future or success. You can identify these statements by the fact that they do not relate strictly to historical or current facts. Words such as 'anticipate,' 'estimate,' 'expect,' 'project,' 'intend,' 'plan,' 'believe,' and other similar words are intended to identify these forward-looking statements. Forward-looking statements can be affected by inaccurate assumptions or by known or unknown risks and uncertainties. Many such factors will be important in determining our actual future results or outcomes. Consequently, no forward-looking statement can be guaranteed. Our actual results or outcomes may vary materially. Given these uncertainties, you should not place undue reliance on these forward-looking statements.

Insight and BNY Mellon Securities Corporation (BNYMSC) are subsidiaries of BNY Mellon. BNYMSC is a registered broker and FINRA member. BNY Mellon is the corporate brand of the Bank of New York Mellon Corporation and may also be used as a generic term to reference the Corporation as a whole or its various subsidiaries generally. Products and services may be provided under various brand names and in various countries by subsidiaries, affiliates and joint ventures of the Bank of New York Mellon Corporation where authorized and regulated as required within each jurisdiction. Unless you are notified to the contrary, the products and services mentioned are not insured by the FDIC (or by any government entity) and are not guaranteed by or obligations of the Bank of New York Mellon Corporation or any of its affiliates. The Bank of New York Mellon Corporation assumes no responsibility for the accuracy or completeness of the above data and disclaims all expressed or implied warranties in connection therewith. Personnel of certain of our BNY Mellon affiliates may act as: (i) registered representatives of BNYMSC (in its capacity as a registered broker-dealer) to offer securities, (ii) officers of the Bank of New York Mellon (a New York chartered bank) to offer bank-maintained collective investment funds and (iii) associated persons of BNYMSC (in its capacity as a registered investment adviser) to offer separately managed accounts managed by BNY Mellon Investment Management firms.

Disclaimer for Non-US Clients: Prospective clients should inform themselves as to the legal requirements and tax consequences within the countries of their citizenship, residence, domicile and place of business with respect to the purchase and ongoing provision of advisory services. No regulator or government authority has reviewed this document or the merits of the products and services referenced herein.

This document is directed and intended for 'institutional investors' (as such term is defined in various jurisdictions). By accepting this document, you agree (a) to keep all information contained herein (the 'Information') confidential, (b) not use the Information for any purpose other than to evaluate a potential investment in any product described herein, and (c) not to distribute the Information to any person other than persons within your organization or to your client that has engaged you to evaluate an investment in such product.

Telephone conversations may be recorded in accordance with applicable laws.
